

# Archived Presentations on National Webinar on 'Nutrition Sensitive Agriculture in Mountain Area'

On the 3rd of December 2020, Lok Chetna Manch along with Welt Hunger Hilfe (WHH) under the guidance of IFOAM, Germany, organised a National Webinar on the critical issue of 'Nutrition Sensitive Agriculture in Mountain Area'. Mr. Jogendra Bisht, President, Lok Chetna Manch initiated the National Webinar addressing the participants and giving a warm welcome to the chief guest Mr. Rajiv Bhartari. Mr. Rajiv Bhartari is an IFS and is presently serving as the Chairman, Uttarakhand Biodiversity Board. He graced the webinar with a sensitising and motivating keynote address with hopes for a fruitful discussion and the possibility of influencing policy changes with regards to the efforts made by various organisations that participated in the National Webinar.

In view of archiving, democratising and providing an easy access to the presentations to anyone interested in going through them, they are all being attached here in the Library section of India forum of MAAN. We at Lok Chetna Manch would like to congratulate all the participants and thank them for their wonderful, informative and engaging presentations that have furthered the issue of adopting Nutrition Sensitive Agriculture, especially in Mountain regions where diet diversity and nutrition feature sparsely.
