Ideally stated the Earth is nicknamed as OXYSPHERE. However, the quantity of oxygen is fast getting depleted, advent to the modern styles of human life across the world with least care, comfort and concern towards plant and animal life on Earth, depriving their food and shelter though they provide food, fiber and shelter to humans. This is a gross injustice caused by humans and deserves to be stalled with a spirit of self discipline, civic order and culture of 'Live and Let Live' without which life becomes extinct from Earth.
